Emily,
I tried again-no luck. I was able to update password AGAIN and then it acted like it was going to let me in but then it said again info wasn't right. Is there any way you all can remote access my computer? Also, if needed, I can go to Whole Kids to see if Connie can do anything with it. It takes about an hour to get there though so I will need some time.

Thanks,
Tina

Subject:A2A Database Access

Hi Tina - I spoke with our IT department, and somehow, the database is showing that you were in the system yesterday. Were you able to get into the system after we spoke?
